KP1, KIIT, Patia, Bhubaneswar, Odisha – 751024

*Results-driven Computer Science and Engineering student seeking opportunities to leverage self-taught full-stack development skills and a passion for creating things that live on the internet.*

## Skills

| | |
|---|---|
| ***Languages*** | *C, C++, Java, Python, HTML/CSS, JavaScript* |
| ***Web Dev*** | *Next.js (React), Vue.js, Tailwind CSS, Bootstrap, Node.js, Express* |
| ***Databases*** | *Firestore, MongoDB, Hygraph CMS, SQLite* |
| ***Data Science*** | *TensorFlow, Keras, NumPy, Pandas, Matplotlib* |
| ***Dev Tools*** | *Git, GitHub, VS Code, Netlify, DigitalOcean, Vercel* |
| ***Other Skills*** | *Flutter, Cryptography, GCP, Linux, Ethical Hacking* |

## Internship and Projects

- ***JPMorganChase Software Engineering Job Simulation (Forage)*** *[GitHub]*
  - *Integrated Kafka into a Spring Boot microservice to consume high-volume transaction messages.*
  - *Implemented transaction validation and persistence using Spring Data JPA with H2 SQL database.*
  - *Connected the service to an external REST Incentive API using RestTemplate.*
  - *Developed REST endpoints for querying user balances via Spring controllers.*
  - *Verified system behaviour using Maven test suites and debugging tools.*

- ***KrishiSeva — AI-Driven Agri-Tech Platform*** *[GitHub]*
  - *Built a smart agriculture platform using **FastAPI** and **React** for crop disease detection and soil intelligence.*
  - *Integrated machine learning models for crop recommendation and yield prediction.*
  - *Developed a responsive web interface for real-time farmer interaction and advisory services.*
  - ***Live:** krishiseva-blush.vercel.app*

- ***JPMorganChase Software Engineering Job Simulation (Forage)*** *[GitHub]*
  - *Integrated Kafka into a Spring Boot microservice to consume high-volume transaction messages.*
  - *Implemented transaction validation and persistence using Spring Data JPA with H2 SQL database.*
  - *Connected the service to an external REST Incentive API using RestTemplate.*
  - *Developed REST endpoints for querying user balances via Spring controllers.*
  - *Verified system behaviour using Maven test suites and debugging tools.*

- ***CoLab Connect – Open Innovation & Collaboration Platform*** *[GitHub]*
  - *Built a collaboration platform allowing users to publish projects and recruit team members.*
  - *Developed REST APIs using Node.js and Express for authentication and project management.*
  - *Designed scalable MongoDB schema for user relationships and project tracking.*
  - *Created a clean UI using Tailwind CSS for simplified idea sharing.*

- ***Back-End Web Development – Booking Management System (1Stop)***
  - *Built ticket booking and blogging system using Laravel and PHP.*
  - *Developed user and admin dashboards for booking and event management.*
  - *Implemented responsive UI using Bootstrap and optimized database queries.*

## Education

| | |
|---|---|
| *2023 - 2027* | ***B.Tech in Computer Science & Engineering**, KIIT DU, Bhubaneswar*<br>*CGPA (5th Semester): **7.1*** |
| *2022* | *B.N.S ENGLISH SCHOOL, VARANASI (CBSE)*<br>*Class XII Percentage: **76%*** |
| *2020* | *B.N.S ENGLISH SCHOOL, VARANASI (CBSE)*<br>*Class X Percentage: **74%*** |
