KP1, KIIT, Patia, Bhubaneswar, Odisha – 751024

Backend-focused Computer Science student skilled in Java and Spring Boot, passionate about building scalable REST APIs and efficient software systems.

Skills

Languages	C, C++, **Java**, Python, HTML/CSS, JavaScript
Web Dev	Next.js (React), Vue.js, Tailwind CSS, **Bootstrap**, Node.js, Express
Databases	Firestore, MongoDB, Hygraph CMS, **SQLite**
Data Science	TensorFlow, Keras, NumPy, Pandas, Matplotlib
Dev Tools	Git, GitHub, VS Code, **Eclipse**, Vercel
Other Skills	Flutter, Cryptography, GCP, Linux, Ethical Hacking

Internship and Projects

- **JobQuest – Job Application Tracker** [GitHub]
  - **Tech Stack:** Spring Boot, Java, SQLite, Thymeleaf, Bootstrap.
  - Built a full-stack job application tracking system with REST APIs and MVC architecture.
  - Implemented Kanban workflow to track application stages (Applied → Interview → Offer).
  - Developed analytics dashboard for tracking application trends and status distribution.
  - Integrated file uploads for resumes and cover letters.
  - **Live:** jobquest-gqlq.onrender.com

- **JPMorganChase Software Engineering Job Simulation (Forage)** [GitHub]
  - Integrated Kafka into a Spring Boot microservice to consume high-volume transaction messages.
  - Implemented transaction validation and persistence using Spring Data JPA with H2 SQL database.
  - Connected the service to an external REST Incentive API using RestTemplate.
  - Developed REST endpoints for querying user balances via Spring controllers.
  - Verified system behaviour using Maven test suites and debugging tools.

- **KrishiSeva — AI-Driven Agri-Tech Platform** [GitHub]
  - Built a smart agriculture platform using **FastAPI** and **React** for crop disease detection and soil intelligence.
  - Integrated machine learning models for crop recommendation and yield prediction.
  - Developed a responsive web interface for real-time farmer interaction and advisory services.
  - **Live:** krishiseva-blush.vercel.app

- **CoLab Connect – Open Innovation & Collaboration Platform** [GitHub]
  - Built a collaboration platform allowing users to publish projects and recruit team members.
  - Developed REST APIs using Node.js and Express for authentication and project management.
  - Designed scalable MongoDB schema for user relationships and project tracking.
  - Created a clean UI using Tailwind CSS for simplified idea sharing.

- **Back-End Web Development – Booking Management System (1Stop)**
  - Built ticket booking and blogging system using Laravel and PHP.
  - Developed user and admin dashboards for booking and event management.
  - Implemented responsive UI using Bootstrap and optimized database queries.

Education

2023 - 2027	**B.Tech in Computer Science & Engineering**, KIIT DU	CGPA: 7.1
2022	**Class XII (CBSE)**, B.N.S English School, Varanasi	76%
2020	**Class X (CBSE)**, B.N.S English School, Varanasi	74%
